NEIGHBORING NOTES.

Items of News Gathered by Busy Herald Correspondents

That Its Readers May Be Pasted on What Is Being Said and Done.

A RESUME OF THE PAST WEEK

If there's a hole in a' your coats, I rede ye tent it; A chiel's amang you takin' notes, And faith he'll prevent it."

Rothwell Notes.

Crops are looking fine in this section.

Every body is quiet except Rothwell, who is overjoyed with the prospects of being our next representative.

The school here opened Monday with a good attendance under the supervision of O. H. Swango, successor to Mr. Chas F. Ringo.

The Wills school is progressing nicely under the supervision of R. M. Ringo.

Miss Annie Rothwell was brought home last Saturday from Mt. Sterling, where she has been confined to her bed for several days with fever.

Chas. F. Ringo, who has been confined to his bed all spring and summer with bronchitis, started last Tuesday for Springer, New Mexico, for his health.

Since the coal road has been made a standard gauge, and the large train loads of freight shipped over it, there has been talk of it being extended farther into the mountains.

Tuesday morning the sad news reached Rothwell that Mr. John Hines' sawmill, about six or seven miles below here, near Salem, had been blown to pieces and that Jim Hines and his son and Frank Smith were killed. Smith was the engineer and notified all that there was danger of the mill blowing up, but before they could get away the boiler exploded, killing the three above mentioned and seriously injuring two others, named Downs and Hill, respectively. Hill is not expected to live. John Hines, the owner of the mill, was blown over one hundred yards from the mill and his body torn to pieces, which had to be gathered up in a cloth for burial. Butler Hines' and Smith's bodies were considerably mangled, both of Smith's legs and one of his arms being broken, besides numerous cuts and bruises about the head. Hill was scalped in the face and on his chest down to his waist and a terrible gash on his head, and is almost unrecognizable. He is conscious and thinks he will get well, although it looks impossible. Downs is not very seriously hurt and will be able to be about soon. The bodies of the dead men were cared for as best as could be and were laid to rest near the place where a few hours before they had been at work and enjoying good health. Mr. Hines was a middle aged man and Mr. Smith was an old employee who had been Mr. Hines' engineer for several years.

PUBLIS.

Lane Sayings.

As I have not seen anything in THE HERALD for some time from our friend "Shanghai," I thought I would give you a few items from Lane. We do not know what has

become of "Shanghai" unless he has gone to setting.

Cutting and putting up hay between showers is the order of the day among the farmers just now. Corn crops never looked better and pastures are the best for many years. Oats damaged by heavy rains.

J. M. Lansaw was tried Tuesday last in Justice Chambers court for shooting on the public highway, and was fined \$50. Just before the verdict was rendered he paid the cost and fine by giving the court "leg" bail.

On last Sabbath Rev. Henry Taylor and G. W. Tyra preached at the Bailey Field schoolhouse to a large and attentive congregation.

Religion and morality are on the up grade in the vicinity of Lane, as we have preaching or Sunday school every Sabbath in all the school houses in the various districts.

The new church house erected by J. R. Elkins will be dedicated by Rev. West of the M. E. Church, on the first Sunday in September and will be free for all religious denominations when not occupied by the Methodists, and free at all times if they choose to worship together.

The common school near Lane, with Richmond Holton as teacher, is progressing nicely.

Rev. Cline Tyra is teaching at Bailey Field and patrons are well pleased with him.

INDEX.

Caney Callings.

Drying and 'stilling apples is the go on Caney.

Frances and Lucinda Rose, from Red River, visited their grandparents, William and Calah Wells, Saturday and Sunday last.

Died, on July 25, of fever, Mrs. Rosaline Holton, wife of Henry Holton. She leaves a host of relatives and friends to mourn her loss, while she is safe in the arms of Jesus.

We were very sorry to hear that Bob Ross was defeated, but we believe that Jim C. Lykins will make a good representative.

James T. Wells has a cow that last week dropped a calf that is something of a curiosity. It has no tail at all and presents quite an odd appearance.

Success to THE HERALD and its many readers.

RED.

Teachers' Institute.

Frenchburg Special.

The Menifee County Teachers' Institute was held at Frenchburg last week with Prof. C. C. Dennis, instructor; L. T. Houvermale, secretary; B. F. Quicksall, Jno. B. Swango and Turner Spencer, committee on resolutions.

Among the teachers were B. F. Quicksall, O. H. Swango, John B. Swango, Joseph Catron, Grant Spradling and Miss Laurie Crain from Wolfe county. The efficient labor of County Superintendent Wells was manifested in the unusual interest taken in the work by the teachers generally. Good lectures were made frequently by L. T. Houvermale, C. C. Dennis, O. H. Swango, B. F. Quicksall, R. M. Ringo, M. T. Hackney, Misses Mattie Hoffman, Mollie Bellware and others. It was one of the most interesting Institutes ever held in the county and proved that Menifee county teachers are at the head of the procession of advancement in the science of teaching.

HATFIELD—MC'COY.

Son and Daughter of the Faction Leaders Said to be Engaged.

Four weeks ago, at a teachers' institute at Nolan, W. Va., Miss Emma Mc'Coy, a daughter of James Mc'Coy, one of the leaders of the Mc'Coy-Hatfield feud of the Kentucky-West Virginia border, met E. R. Hatfield, son of "Jonce" Hatfield, a leader of the Hatfield faction, and the young folks were not long in evincing a decided appreciation of each other's company.

This state of affairs continued up till the last of the session, by which time the entire community was interested. It is reported that young Hatfield announced that they intended to marry, and the people of that section are now gambling on whether it will cause a reconciliation or a renewal of the old fight.

"It is the best patent medicine in the world" is what Mr. E. M. Hartman, of Marquam, Oregon, says of Chamberlain's Colic, Cholera and Diarrhoea Remedy. "What leads me to make this assertion is from the fact that dysentery in its worst form was prevalent around here last summer and it never took over two or three doses of that remedy to effect a complete cure."

For sale by John M. Rose.

Some Summer Don'ts.

Don't wear a straw hat with a full dress suit.

Don't wear a dress hat and a shirt waist—it's bad taste.

Don't ask a girl to eat ice cream with you if you don't mean it.

Don't imagine you are a brash band. Your whistling annoys people.

Don't tell your girl it's unhealthy to drink soda water. She knows better.

Don't ask "is this hot enough for you?" if you want people to think well of you.

Don't spend all your money on summer 'scurios. You may need a new overcoat next winter.

Don't aspire to be a sorcerer if you ride a wheel. Moderate riders have more fun—and live longer.

Don't think, dear girls, that your sweetheart is jealous because he looks pained. His corns may hurt him.

Don't consume too much melon, fruit and cool liquors on a warm day. You may not make a handsome corpse.

Don't cuss a newspaper if you never pay for one. They're not trying to please you; it's the fellow who pays that they're printed for.

Lightning Hot Drops—What a Funny Name!

Very True, but It Kills All Pain. Sold Everywhere. Every Day—Without Röller, There is No Pain!

Murder in Montgomery.

Horace Reynolds, aged about 19 years, was found dead in a thick cluster of bushes near Jeffersonville, Montgomery county, Saturday. He had been shot in the back with a shot-gun, two shot taking effect, and his head nearly severed from his body with a knife. John Hawkins, a young married man, of that neighborhood, who is suspected of his murder has disappeared and has not yet been captured.

Read THE HERALD and be happy.

THE KENTUCKY GUN.

Comments of the Press of Other States on Killings in Kentucky.

Kentucky continues free and reckless in the use of the pocket gun and sparing of its hemp.—Pittsburg Dispatch.

Kentucky is overrated. What commercial activity she has comes from the selling of race horses and whiskey to northerners. Next to horses and whiskey her specialty is homicidal colonels.—Chicago News.

If Kentuckians are shocked by the savage Kentucky way it is their own fault. It is, because they make murder safe and respectable by encouraging the murderous disposition and condoning the crime. If a Kentuckian has powerful family and friendly influences he can arm himself to kill and kill his fellow men without loss of standing or fear of the consequences.—St. Louis Post Dispatch.

Killing at Versailles.

On Sunday afternoon, the 4th inst., at the Woodford Hotel in Versailles, W. N. Lane, of Montgomery county, shot Col. H. C. Rodbaugh, proprietor of the hotel, and his son James, the latter dying almost instantly and the former mortally wounded. Lane was said to have received a slight wound, but this is denied by Versailles doctors. He was arrested and put in jail at Versailles, but for fear of mob violence he was removed to Lexington for safe keeping. His examining trial is set for August 23, and Col. W. C. P. Breckinridge will defend him.

Mr. C. G. Strong, principal of the public schools at Anderson, Cal., says: "I have used Chamberlain's Pain Balm and have found it an excellent remedy for lameness and slight wounds."

Lameness usually results from a sprain, or other injury, or from rheumatism, for which Chamberlain's Pain Balm is especially intended and unequalled. It affords almost immediate relief and in a short time effects a permanent cure for sale by John M. Rose.

Daniel Boone's Compass.

Nrs. T. F. Hensley, of this paper, has a souvenir in the way of a small pocket compass, mounted in a rosewood frame which she values very highly, not only because it was a gift from her father, now deceased, but from the fact that it has been in the family for over half a century and was at one time the property of Daniel Boone.

Boone gave the compass and an old-fashioned sun glass, used in those days to kindle fires, to Abraham Miller, her great uncle, who was a friend and hunting companion of Boone in the early days of Kentucky. Miller gave it to his father, his nephew, about forty years ago, so that the history, or rather tradition, as to its being a genuine Daniel Boone souvenir is unquestioned.—El Reno Democrat.

A Columbus, Ind., Thomas Banning, a railroader, came over from Jeffersonville to wed Miss Minnie Williams. The young lady didn't make her toilet quick enough to suit the young man, so he declared the wedding off and skipped out. This should be a warning to young ladies that a young man is not the most patient animal in the world.

Notice.

The Teachers' Institute of Wolfe county will be held at Hazel Green beginning August 26, 1895, and continuing five days. The instructor will be Prof. John C. Willis, of Mitchell, Ind. All the teachers of the county and those holding a certificate to teach are required by the law to attend. Thursday is "Trustee Day" and Thursday afternoon will be devoted to the duties and work of the trustees, and all the trustees of the county are requested to be present. Let every teacher come with some special preparation on some branch of the work. Prof. Willis will deliver a lecture on Tuesday night. Admission 10c.

A. F. BYRD, County Supt.

Col. Thomas S. Moberly, of Richmond, Ky., was drowned while bathing at Virginia Beach, Va., on Wednesday. Col. Moberly was one of the most prominent citizens of his county and the recognized head of the short horn interests of the United States.

Champion Jim Corbett and lanky Bob Fitzsimmons, who are billed to fight for the world's championship at Dallas, Tex., in October, met in a Philadelphia saloon and came near settling who had the best claim to the title of champion then and there. Blows were exchanged, but friends separated them before much damage was done.

"The great American hog" was at church a few nights ago. He took up enough room for six persons and spit tobacco all around his sweet-scented self for three or four feet. Such a man ought not to be allowed to associate with gentlemen, much less ladies. He ought to be put in the stray pen the next time he is out and sloped with ordinary every day hogs.

An injunction on the famous old liberty bell is the very latest freak of Philadelphia litigation. A bill in equity was filed this week in the common pleas court to have an injunction issued restraining the city from taking the liberty bell to the Atlantic Cotton States Exposition. The objection to the junket of Liberty's revered emblem is that it is already cracked, and may be utterly ruined by these repeated journeys.

Why Not You?

When thousands of people are taking Hood's Sarsaparilla to overcome the weakness and languor which are so common at this season, why are you not doing the same? When you know that Hood's Sarsaparilla has power to cure rheumatism, dyspepsia and all diseases caused by impure blood, why do you continue to suffer? Hood's cures others, why not you?

Hood's Pills are prompt and efficient. 25¢.

The telephone line from Mosehead to West Liberty was completed several days ago and the inspectors of the line have now accepted it as being constructed according to contract. The stockholders have met and elected the following officers: Hon. W. M. Kendall, president, and Henry M. Cox, secretary. The same contractors are now letting out the stock in a line from West Liberty to this place by the way of the Caney coal fields.

POSING AT THE PIANO.

Paderewski Thinks That Pianists Should Look Effective While Playing.
When Paderewski was in New York he was calling at a prominent Wall street man's home in Fifth avenue when the broker told him he would like to have his opinion of his daughter's playing, says the New York Journal. The great pianist courteously replied that nothing would give him greater pleasure.

After the young lady had dashed off several selections Paderewski said:

"To get the greatest enjoyment from the piano the music must not only be heard but the performer should be seen. The performer should therefore be careful of his or her position at the instrument."

"I will be frank with you and say that I prefer to see rather than hear your daughter play. I might better say that I looked more than I listened. She held herself correctly. There is nothing I hate more than a listless, careless posture of the body while playing."

"Then there was life in her touch. Her fingers fairly sparkled as they ran over the keys and touched the keys, rebounding from them with a snap that was exhilarating to behold. Her manner of using her hands and her elbowing. If I may so call it, showed proper training also."

"I will therefore add that my sense of hearing would be equally delighted, doubtless, if my sense of sight had not been so completely monopolized. I complimented the young lady on her accomplishment."

"There is wisdom in that," said the broker, in repeating the conversation. "Teachers of the piano should give far more attention to this matter than we now do."

AS HARD AS THE DIAMOND.

Such Are Two Products of Chemistry.

The diamond has always been regarded as possessing one quality which placed it beyond rivalry, namely, that of hardness. There are several gems which compete with it in beauty, and at least one, the ruby, when of rare size and quality, outranks it in costliness. But none in the whole list equals it in hardness.

"Diamond cut diamond" has become a popular saying. The hardest steel cannot equal the diamond in that respect. The diamond, says a recent and authoritative text book of chemistry, "is the hardest form of matter known."

But science progresses, and if nature has set aside for her king of gems the distinction of unparalleled hardness, the art of man has not been equally considerate. There are at least two products of man's experiment which have proved, according to the great French chemist, Henry Moissan, to be as hard as diamonds.

These are produced from the rare metal titanium. Monsieur Moissan has succeeded in preparing titanium in the electric furnace. In the pure form it is harder than steel or quartz, and when combined with silicon or boron, so as to form a silicate or boride of titanium, it matches diamond in hardness.

Titanium resembles tin in its chemical properties, and it is the characteristic element in the beautiful red and brown crystals of rutile. These, in the shape of needles, are sometimes found penetrating large white quartz crystals, forming gems that the French call "love's arrows."

Nature's Lightning Rod.

M. Ovaroff, the Russian electrician of Moscow, and Prof. Hirsch, government forest inspector of the same city, have made some investigation concerning the liability to lightning stroke of certain species of trees. In the summers of 1893 and 1894, the two scientists mentioned spent 109 days in the great forests of Moscow and surrounding districts, and during that time found 197 trees that had recently been struck by lightning. Of the total number of marked trees 102 were found to be white poplar (populus alba), this notwithstanding the fact that that species is not any ways as common as a half dozen or dozen other varieties. On Ovaroff's suggestion the government recommends that the peasants use it as a lightning conductor.

His Way.

We all know the story that of that bright boy who answered correctly when asked how to fly a kite, but had not been enabled to do it, only by watching an insect and counting. The Philadelphia Record gives a parallel case: A teacher recently told her scholars to mark on their slates the Roman numerals, from one to twelve, about three minutes, one of the boys had put his hand signifying that he had counted the words. "Why, John," said the teacher, "how you must have hurried! None of the boys have half done. Now tell me how you came to finish so quickly." "I copied them from the clock on the wall up there," replied Jimmy, with great glee.

The Sheep Renewed.

Pedestrians looking at the "happy" life of a marquis have often wondered if the young man ever laid aside his lion. The Marquis answers: The owner of a menagerie in Berlin, which included a lion, a wolf and a sheep, was asked day in confidence how long these animals had lived together. "About months," he replied, "except the one which has to be renewed occasionally."

AMONG TOYMAKERS.

Miss Amelia B. Edwards Tells of What She Saw in the Toyland of the Tyrol. Miss Amelia B. Edwards, in her "Untrodden Peaks," mentions many an interesting visit to the homes of the working people of St. Ulrich, where so many toys are made.

"In one house," runs the account, "we found an old, old woman at work. Magdalena Paldau, by name. She carved cats, dogs, bears, and elephants. She has made these six animals her whole life long, and she has no idea how to eat anything else. She makes them in two sizes, and she turns out as nearly as possible a thousand of them a year. She has no model or drawing of any kind to work by, but goes on steadily, unerringly, using pieces of different wood, and shaping out her cats, dogs, wolves, sheep, goats and elephants with an ease that is an amount of truth to nature that would be clever if it were not utterly mechanical. Magdalena Paldau learned from her mother how to carve these six animals, and her mother had learned, like manner, from her grandmother. Magdalena has now taught the art to her daughter, and it is so well done that it is being transmitted for generations."

Another house Miss Edwards found the whole family carving skulls and crosses for fixing at the bases of crucifixes, for the wood carving of Grodner that is religious in its nature as well as amusing. In other houses the working families that carved rocking horses or dolls or other toys, and in still other houses there were families of painters of pictures.

"In one house," says the gifted authoress, "we found about a dozen girls, painting gray horses with black points. In another house they painted only red horses with white points. It is a separate branch of the trade to paint saddles and headgear. A good painter points two or three horses a day, each costing about one cent. In length, and for these she is paid fifty-five cents, or about 25¢ shillings three pence English."

PARTIES OF SHOPPERS.

Accomplish Less and Try the Clerks More Than Does an Individual.

Is there any season of the year when women don't "shop?"

I suppose there must be, but I declare whenever I visit one of the mammoth emporiums I am filled with the fair ones, like as bees.

They generally hunt in couples, or even in threes or fours, and the shopmen and women rather resent this.

For, if Miss Jones is alone, she has only one mind to make up. But a quartette means four times the work, or so the shopkeepers have often assured us.

For instance:

"Oh, that's just lovely! I've been looking for that all day. Can you let me have fourteen yards?"

"Yes, I can."

The shopman unrolls the silk and takes off his scissors.

"Wait a moment, Jennie, do you like that for me?"

Jennie likes it very much, and again the scissors fly over the air.

"I suppose you think of it, Emma?"

Emma has her doubts, and Susie is quite sure it won't be becoming.

"Oh, then wait! You needn't cut off. I'll look at something else."

The shopman pockets his scissors, and brings out a sigh instead, for the bevy in time float away, and that sale is dashed.

THE HORSELESS AGE.

Electricity Will Soon Drive the Useful Animal Off the Street.

Dr. Chauncey M. Depew, who was asked whether the horse was to be replaced, said: "I imagine that one morning we will wake up with apparatus ready to take us to our offices by an automobile carriage, or, perchance, through the air. But in spite of my full belief in the electric carriage of the future I doubt whether the service of the horse will ever be entirely dispensed with. I cannot conceive Americans giving up their horses to the service of pleasure in carriages driven by electricity or by any other kind of motor but the horse. What has made the bicycle so universally popular but the one fact that it permits of action on the part of the rider, that it affords excitement? For similar reasons the carriage horse will always have friends and admirers; but, style, action and movement, he is to be replaced, everyday horse, he is certainly doomed. The extent to which electricity has discredited and replaced him is exemplified by the fact that he no longer pays to breed horses but a moderate price."

More Benefit From One Bottle.

W. S. Vassar, Santa Cruz, Cal., writes:

"I received more benefit from one bottle of Dr. Fenner's Kidney and Backache Cure than any thing I have found."

DR. FENNER'S

Kidney and Backache Cure

DID IT.

A Great Renal Depurant.

Cures all diseases of the kidneys, bladder, ureters, passages. Female Weaknesses.

Bed Wetting in children, Dropsy, Heart Disease, Rheumatism, Skin and Blood Diseases, Swelled Limbs, Bright's Disease, Impotency, etc.

Satisfaction guaranteed. Sample free.

THE HERALD.

SPENCER COOPER, : : : Editor.

HAZEL GREEN, KY.
THURSDAY, August 15, 1895.

DEMOCRATIC STATE TICKET.

For Governor,
P. WAT HARDIN, of Mercer.
For Lieutenant Governor,
R. T. TYLER, of Fulton.
For Treasurer,
R. C. FORD, of Clay.
For Auditor,
L. C. NORMAN, of Boone.
For Register of the Land Office,
G. B. SWANGO, of Wolfe.
For Attorney General,
W. J. HENDRICK, of Fleming.
For Secretary of State,
HENRY S. HALE, of Graves.
For Supt. of Public Instruction,
ED. PORTER THOMPSON, of Owen.
For Commissioner of Agriculture,
ION B. NALL, of Louisville.
For the Legislature—91st District,
JOSEPH C. LYKINS,
Of Wolfe.

Subscribe and send in job work.

The Democrats of Menifee county instructed for Hon. J. H. Williams for state senator.

Jim Barnes is tipped as the Republican to make the race for the legislature in Rowan and Bath.

Next Monday night at Louisville the first debate between Gen. Hardin and Col. Bradley will occur. People from all over the state will attend.

The Democrats of Bath county instructed for Judge J. C. Nelson, of Sharpsburg, for the legislature. Judge Nelson is editor of the Sharpsburg World and is a prominent Democrat.

The Democratic appellate court committee for the Louisville district Monday declared Judge Geo. B. Eastin the Democratic nominee for judge of the court of appeals. No other candidate had submitted his name for party action.

The employees of the Pennsylvania Bolt and Nut company have been notified of a second advance of 10 per cent in wages and the Lebanon Iron company has also increased the wages of its employees 10 per cent.

Centre College, at Danville, authorizes county judges to appoint some young man to a scholarship at that college, free of charge, who is unable to pay tuition. Board will cost \$2.00 per week. This is a splendid opportunity for young Kentuckians to enter one of the best schools in Kentucky and get a free education.

The Breathitt county people say they are sure to get the Broad railroad. The corps of engineers have surveyed the route three times with a view to a permanent location. The proposed road is to tap the Lexington and Eastern one mile below Jackson and the plan is to have no station at the junction, but to build the switches at Jackson. The engineers have been discharged from service 'till September, when it is expected that they will survey the Mill Creek route. It is hard to say what the company will do and our people can do nothing but protect their interests and wait their time.

The Reason For It.

FRANKFORT, KY., July 28.—The cat is out of the bag. The strange silence of the negro politicians in Kentucky after the Republican convention failed to put a negro on the state ticket is at last explained.

It was worked on the quiet and the skillful promoters thought the plan would never be divulged, but it has gradually leaked out that the Republicans have promised, in the event of success in November, to divide all clerkships and appointments with the negroes.

In a number of state campaigns heretofore the colored brother has had a representative on the ticket, but he is conspicuous by his absence this time, and yet there is not the first sign of a kick. In former years, whenever the black was ignored in the State Convention, there was a big howl raised. Not so this year. Why? Because when the colored brother presented himself in the form of a committee to the party leaders at the Louisville Convention and asked what was going to be done with him, he was taken into a secret conference—regular star-chamber pow-wow—that no one but those inside the small room at the Willard hotel were to know.

The colored brother was told in strict confidence that if a negro was put on the state ticket it would be materially weakened thereby, as many of the best Republicans and all the Democrats who were thinking of deserting would refuse to vote if the ticket was not all white.

He was told furthermore that if he would not insist on having a place on the ticket he would be given half the clerkships at Frankfort, and half the appointments to be made by the governor in consideration of the fact that half the Republican votes in Kentucky are furnished by the colored brother at every election.

A Paper Free.

Send your name and address for a sample copy of "Marriage Bells," an 8 page paper containing the names and descriptions of hundreds of young people who wish to correspond for fun and results. Girls send your name, description, age, etc., and receive hundreds of nice letters from boys. Boys send your description, etc., and receive dainty written letters. All ads. published free. Perhaps you may find a husband or a wife and have plenty of fun. Send your name and description by postal or letter at once and behold the result. Do not delay, and address

FLOYD D. HUFFMAN,
Grand Rapids, Ohio.

Protect the Game and Fish.

Shoot or fish only in the proper season and escape the game warden by observing the laws. Many states have new game and fish laws this year, and if you don't them, send five 2 cent stamps for a copy of the Game Law issue of the American Field, 245 State St., Chicago.

Letter From Texas.

PANO, TEXAS, Aug. 8, 1895.

Mr. SPENCER COOPER: As my time has been up some time on my subscription, and you did not stop the paper, I thought I would send you a little more money. I am glad you did not stop it for it is like receiving a visit from an old friend to get THE HERALD.

Yours, A. W. Ely.

The storeroom and stock of merchandise of J. D. Phipps, valued at \$4,000, and the residence of Buford Elliott, household goods and barn and contents, valued at \$2,000, were burned last Friday night at Yocum Springs, a small place in Morgan county, and were a total loss.

JUDGE JACKSON.

Associate Justice of the United States
Supreme Court Dead.

Associate Justice Howell Edmund Jackson, of the supreme court of the United States, died on Thursday afternoon at his home, West Meade, six miles from Nashville, Tennessee. Judge Jackson had been in failing health for the past four years, but it has been only in the past eight or nine months that the progress of his disease began to cause his family and friends uneasiness.

Howell Edmund Jackson was born in Paris Tenn., April 8, 1822, so that he was in his 63rd year at the time of his death. Justice Jackson was a classical scholar, graduating from the West Tennessee college in 1848.

He studied law two years at the University of Virginia and at Jackson, under his kinsmen, Judges A. W. O. Tottan and Milton Brown, graduated from the Lebanon law school in 1856, in which year he located at Jackson and engaged in the practice of his profession; removed to Memphis in 1859, where he continued the practice of law; served on the supreme bench by appointment on two occasions, and was once a prominent candidate for supreme judge before the nominating convention; relocated in Jackson in 1876; was elected to the state house of Representatives in 1880 on the state credit platform; was elected to the United States senate as Democrat in 1881, and served till April 12, 1886; was appointed United States circuit judge by President Cleveland and nominated for associate judge by President Harrison; was confirmed by the senate February 18, 1893, and entered the duties of that office March 4, 1894.

Judge J. W. Perry is confined to his room from the effects of a surgical operation last Monday by Dr. D. A. Coyle, assisted by Dr. W. A. Brock, of this city, and Dr. L. D. Carter, of West Liberty, Ky., in the removal of an enlargement of the left shoulder, caused by a wound received many years ago. The operation was entirely successful, and the Judge will be at his office in a few days.—Lexington Leader.

MINISTERS OF THE GOSPEL ENDORSE

ELECTROPOISE.

Rev. John L. Rogers, Danville, Ky.
Rev. Z. Meg, Cynthiamburg, Ky.

I have used the Electropoise for five years and find it invaluable a curative agent, especially in the efficacious in cases of feeble and debilitated children.

Rev. Robert Barrett, Louisville Baptist Seminary.

Electropoise cured after all other remedies failed.

W. W. Bruce, Hustonville, Ky.

Electropoise cured opium habit.

Rev. Geo. Means, Covington, Ky.

In one night the Electropoise relieved bridle congestion and vertigo.

We could fill this paper with similar reports, but think this sufficient to interest you in sending for book on the subject of health. Electropoise rented four months for \$10.00.

MT. STERLING, K.

THE HERALD.

TRY THE HERALD for one year.

J. H. Swango went to Jackson last week.

Walter Day, of Froze Creek, is on the sick list.

Dock Hicks, of Harrison county, was in town Wednesday.

Rev. West, of Campton, was in town Wednesday and Thursday.

Remember the date of the fair, October 2nd 3d and 4th.

Aunt Sallie Trimble is very low and her recovery is very doubtful.

Elder J. A. Howard is confined to his home near Ezel with typhoid fever.

Carl Mize, who has been suffering with fever for several days, is now much improved.

Several droves of cattle have gone down this week for the Mt. Sterling markets.

Volney Nickell, deputy sheriff of Morgan county, was in town Wednesday on business.

Several bids for booths at the fair are being received, and a few privileges have been sold already.

The best is what you want when you are in need of a medicine. That is why you should insist upon Hood's Sarsaparilla.

Dick Franklin, colored, so far has the boss wheat crop. It turned out thirteen bushels to the bushel sowing.

Rev. Davidson, who held a series of meetings here twelve years ago, has been preaching at the Methodist church during the past week.

W. A. Albright, of Millersburg, the champion life insurance man, is now under treatment of Dr. Taulbee at Swango springs.

Chas. Andre, the genial gentleman and book keeper for J. T. Day, has returned from a week's visit to friends and relatives in Virginia.

Misses Emma Slimp and Ava Swango paid our office a pleasant visit last week. Miss Swango is teaching school at Point Union, in this county.

John H. Pieratt, who took the Pelfry children to the Masonic Orphans' Home at Louisville, returned last Friday. There are now over 250 children in that institution.

MARRIED, August 1, at 11 o'clock a. m., at the residence of the bride's father near Wellington, Menifee county, Mr. O. P. Wells, jr., to Miss Mary Elizabeth Botts.

The big meeting at Ezel has closed with a pronounced success. Several ministers of the Gospel declared their intention of preaching for Christian unity. Among them was Rev. Frank P. Wilson, of Lee City.

B. F. Quicksall returned Friday evening from Frenchburg, where he has been attending the Institute. Ben is one of the best teachers in this section of the state and if all our schools had such teachers our country would soon be elevated to a higher intellectual plane.

Lexington will be in telephonic communication in a short time with several of the mountain country seats. A line is being constructed from Morehead to West Liberty and from West Liberty to Hazel Green connection with Lexington will be made through Mt. Sterling—Lexington Leader.

Ohio has \$8,000 ex-Federal soldiers.

Major William Owens, chief of the detective bureau at Louisville is dying.

Rev. J. F. Pieratt has been very sick for several days, but is now considered out of danger and we hope soon to report his recovery.

The secretary of the fair is much encouraged at the outlook for this year. He says we will have some fine horses from a distance.

The Centralia (Mo.) Guard says that the corn is so tall in that section that the coons are dying of over-exertion from climbing up to the roasting ears.

The prospect for good crops this fall was never better than at the present time. If the weather is seasonable for the next six weeks corn will not be worth twenty-five cents per bushel.

Dr. Lockhart, of Ezel, president of the fair, was up yesterday arranging the program for the sixth annual meeting to be held on October the 2nd, 3d and 4th respectively. He thinks the outlook most encouraging.

Joseph D. Martin has brought suit for \$2,500 against Chief of Police Charles Wilson, of Mt. Sterling, for shooting him in the leg and causing its amputation, some time ago. Martin was resisting arrest at the time of the shooting.

Drs. Taulbee and Nickell report the following on the sick list. Rev. J. T. Hieratt, Louie Pelfrey, Mrs. Nancy Chenault and Mrs. John H. Rose. They also report Mrs. Louie Nickell, who lost the ends of three fingers in an apple mill, as doing well. Mrs. John H. Pieratt is convalescing.

An old swindle is being worked on farmers of the counties of Eastern Kentucky. The swindler writes a telegram to suit the occasion for his victim, several miles in the country, delivers the message and makes his charges for dispatch and delivery from \$1 to \$5 on account of presumed importance and distance.

Now that the farmers are harvesting their hay it would be well for them to consider plans for preserving it. The strength in the hay is best preserved by baling. Knowing ones say it will lose at least half by placing it loosely in the barn loft or even stacking it in the field. A baling machine will only cost a trifle and every farmer should have one.

Prof. Wm. H. Cord, of the Hazel Green Academy, is teaching the West Liberty Institute this week. The professor is a tireless worker at any thing in which he is engaged and especially so in educational matters. Send to him for a catalogue of his school, which will open about the first of September. Every friend of education should stand by him in his labors for us.

One night when Mr. Isaac Reese was staying with me, says M. F. Hatch, a prominent merchant of Quartermaster, Washington, I heard him groaning. On going to his room I found him suffering from cramp colic. He was in such agony I feared he would die. I hastily gave him a dose of Chamberlain's Conic Cholera and Diarrhea Remedy. He was soon relieved and the first words he uttered were, "what was that stuff you gave me?" I informed him, "A few days ago we were talking about his attack and he said he was never without that remedy now. I have used it in my family for several years. I know its worth and do not hesitate to recommend it to my friends and customers. For sale by John M. Rose.

Lexington will be in telephonic communication in a short time with several of the mountain country seats. A line is being constructed from Morehead to West Liberty and from West Liberty to Hazel Green connection with Lexington will be made through Mt. Sterling—Lexington Leader.

Lexington will be in telephonic communication in a short time with several of the mountain country seats. A line is being constructed from Morehead to West Liberty and from West Liberty to Hazel Green connection with Lexington will be made through Mt. Sterling—Lexington Leader.

Our Own People

Tell What

Hood's

Sarsaparilla

Has Done for Them.

"When our baby was three weeks old he broke out with sores which the doctor called a severe case of eczema. We tried everything that we could think of but he failed to get relief. We consulted several doctors but their medicine was of no avail. Seeing a similar case which had been

Cured by Hood's

Sarsaparilla we determined to try it. I procured some of this medicine and it proved to be the only thing which gave satisfaction. Our child is now two years and eight months old and weighs 40 pounds. He is a sprightly lad and is very healthy. He has been completely cured by Hood's Sarsaparilla. This has proved a celebrated case in this vicinity and his cure has been a surprise to all those who know about it." J. T. WHALEY, Haze Green, Kentucky.

The record of remarkable cures effected enables us truthfully to say that

Hood's Sarsaparilla

Is the Only

True Blood Purifier

Prominently in the public eye today. Be sure to get Hood's and only Hood's. Do not be induced to buy any other.

Hood's Pills easy to buy, easy to take, easy in effect. 25¢.

Do You Wear Pants?

IF SO, WEAR ONLY

KENTUCKY JEANS CLOTHING CO.,

LOUISVILLE, KY.

Every pair warranted.

Circuit Judge John S. Patton did not die at his home near Hindman, Knott county, the past week, as was widely reported. He was very ill, but is now some better.

Make another notch for Kentucky. Wesley Brock shot and killed his brother-in-law, Lewis Payne, near Payne's depot, Scott county, Monday. In Woodford county farmer Samuel Burks tried to kill his brother in a quarrel.

The records show that 655 firms and corporations have voluntarily advanced the wages of 514,000 employees during the present year, which is more than all the strikes have ever done for the promotion of the interests of labor.

Chas. O'Connell, of Mt. Sterling, arrived in town Tuesday afternoon. He came in on the hurricane deck of a sad-eyed mule and will doubtless remain until Hazel Green has railroad connections with Mt. Sterling. He is employed in THE HERALD office.

Some thoughtless boys and it pains us to say some young ladies, have conducted themselves in a manner rather unbecoming to well-bred people. We should guard well our conduct at all times, but no where does one reflect more upon his bearing than at church services.

Some time during Saturday night two noted Eastern Kentucky desperadoes escaped from the Estill county jail at Irvine. The "birds" didn't lose any time in leaving Estill county, and so far they have not been captured. The two men are William Puckett, a noted desperado, and his brother, George Asbury, a Lexington Commonwealth.

A FAMOUS LIBRARIAN.

The Great Life Work of Ainsworth R. Spofford.

He Has Done More Than Any Other Man to Make Americans Proud of the Literature Produced by the Authors of America.

Just now Librarian Spofford, writes the Washington correspondent of the New York Tribune, is busy with plans for the arrangement of the new library, into which he hopes to move before two years are past. The exterior of the building is quite completed, and work on the interior is progressing rapidly, which is matter of great gratification to Mr. Spofford, who has labored for years with one end in view—that the national library should be worthy of the nation.

Mr. Spofford came to Washington in 1861, when he was appointed first assistant librarian by President Lincoln.

Three years later he became Librarian, which office he has held continuously since.

His remarkable memory is a subject for wonder and comment.

He seems to have the 700,000 books which compose the library catalogued in his mind, and remembers facts about the most insignificant volumes, when they were written, by whom, and when they came into the library.

He will, at a glance, call up the references on every subject without having resort to any catalogue save that in his own mind. His knowledge is limitless, and with it he is generous and helpful, seemingly having an interest in the researches of each individual.

Mr. Spofford is a man of great nervous force and energy, of indomitable industry, and possessed of unusual power of concentration.

The force within him, indeed, seems to be too great for his slender frame.

When Mr. Spofford took charge of the library, it had not yet recovered from the destructive fire of 1855, and contained only 70,000 volumes. In the thirty years he has been in charge the library has increased tenfold, and now contains 700,000 volumes, to be found in the capital.

The shelves and floors are piled with books and documents, while the immense number of pamphlets and other copyrighted matter has found an asyllum in the crypt. Mr. Spofford's desk even is surrounded by great piles, and just at present the library, with its loads of matter for which there is no room, resembles chaos. The removal

AINSWORTH R. SPOFFORD.

of this great library will be a colossal task, but already Mr. Spofford is arranging for it, and neatly tied bundles of books labeled "for the new library" are placed in heaps awaiting the auspicious day when they shall find a final resting place in the great building, with its spacious rooms and galleries and accommodations for over 2,000,000 volumes.

In the new library, Mr. Spofford says, students will have adequate space and seclusion. No one who has not tried to work at the present library can understand the inconveniences and drawbacks to the accomplishment of work. There is no room for books. The tables are crowded, and quite impossible to have a visiting public be permitted to make audible comments and where the professional guide has entry. But to no one will the new building be so great a satisfaction as to Mr. Spofford, who has worked and waited for it these many years. Small wonder that he is completely engrossed in evolving plans for the administration of its affairs.

Flying Snakes of the Antipodes.

The race of flying dragons which spread dismay and terror in old times is not yet entirely extinct, if we are to believe the account of a late Queensland (Australia) paper. The Queensland Mercury, of March 18, says: "James Bass, of the sandy flat, lying beyond the Blue Hill, near the head waters of Carns' creek, has brought another specimen flying serpent to this office. It is somewhat smaller than the one exhibited by him at Sydney last year, and it is said the latter was presented to the Emperor. The other two it has four three-jointed legs, each 7 inches long. Between these legs, which are situated on each side of the body, is a leathery membrane, much resembling a bat's wing. Mr. Bass declares that he has often seen them fly across Carns' creek at places where it is 60 feet wide."

History of the Wedding Ring.

A long time ago the wedding ring was worn on the forefinger, and was thickly studded with precious stones. People who have seen the old pictures of the Madonna in Rome will remember

her that in one or two of them there is a gleaming ring on the forefinger of her right hand, but with Christianity came the wearing of the wedding ring on the third finger, and the first old story of there being a vein that runs from that finger to the heart is nonsense. Its use originated in this way: The priest first put it on the thumb, saying: "In the name of the Father;" on the forefinger, adding, "In the name of the Son;" on the second finger, repeating: "In the name of the Holy Ghost;" and on the third finger, ending with "Amen," and there it stood.

MODEST TONGUE.

The Witty Reply of an Irish Hospital Patient.

A doctor should be a master of push and parity, for he will get his patients into bed, intent upon concealment more than he reveals as to the cause of his sickness. Dr. Roosevelt, in an article, "The Hospital," published in Scribner's, tells how he was once worried in a professional interview at the Roosevelt hospital with an Irish laborer. The doctor writes:

I was struck by the humorous look of my face, but, however, by the smile on his face, I inferred that he was not quite willing to go anywhere, and take a hand in any trials that promises them a profit. Scores of them may be seen at any shipping port, such as New York, Philadelphia, Liverpool, London or Boston. Some of them are large, some small, some clean, some dirty, some ugly and some neat and trim. They vary greatly in appearance.

As a rule, however, the crews of the ocean have women hulks discarded by the companies who own them. Belonging to no regular line or any trade in particular, they are sent out to pick up a cargo wherever they are able to do so.

Many of them are utterly unseaworthy, and sometimes the boilers are on the point of explosion, and the machinery in bad repair. Often the crew are not paid, and the ship is often great stress of weather, the steering gear is apt to jam at some critical moment, and at such a time the crew are in a bad way, and, in fact, nearly everything is the matter with them that could be the matter with a ship.

Yet, in spite of all these discomforts and dangers, so long as the vessel holds together, and can sail safely from port to port, no one can complain except the crew, whose arrangements are often such that they cannot leave the ship.

To prevent desertion care is taken to ship only married men before the mast, and these men are given half pay in advance for their families, on condition of giving bond against desertion.

A more uncomfortable and in every way disagreeable life than that of an ocean crew cannot well be imagined. The crews are made up of mixed races, and their wages vary according to the vessel and the trade in which it engaged.

The average wages may be said to be as follows: Chief officer, \$85.80; second officer, \$29.30; chief engineer, \$65.18; second engineer, \$36.60; carpenter, \$20.70; steward, \$20.30; cook, \$23.11; boatswain, \$19.40; able seaman, \$17.25; ordinary seaman, \$15.25; fireman, \$12.50.

These wages are a little better than those which are paid on other ships, on account of the extra hazardous risks taken by the men. The tramp ships make the most erratic journeys, wading pretty much over the whole world before returning to the same port. After carrying a cargo of coal from Cardiff to one of the Indian ports, they go to New York, then to Antwerp, and may then go to Capo Town, and from there to Shanghai, going to San Francisco before returning to the port from which she originally came.

The operating expenses of the ocean tramps are very small. The coal consumption is reduced as much as possible, and the crew is small, while the officers are kept at the lowest notch practicable.

They are very unpopular as sea, and their namesakes on the shore, their hand is against every one. They are the terrors of small craft, such as yachts and fishing smacks, and many a boat that has been run down in a collision blames a tramp steamer for the accident, as the tramps keep a poor lookout, or none at all.

Cats get along perfectly well without stomachs, according to experiments recorded in the Archives of Pathology. In one in which a cat, forty days old, after its stomach had been cut out, the oesophagus was found to have been completely united with the intestine. Another cat, which weighed four pounds when it lost its stomach, was alive and well and weighed four pounds and a half three months and a half after the operation. It found difficulty in digesting its food, but got along nicely when the milk was mixed with yolk of egg and rice, and ate cooked meat, cheese, and a purse of potatos. This proves that all three classes of food, albuminoids, fats and carboaceous substances, are digested by the gastric cat. As it had been previously proved that dogs can do without stomachs, the next step would seem to be the production of a gastric man.

The Chinese bungler takes an ingredient of his own, burns it and blows the smoke through the keyhole of the bedroom where the master of the house is asleep. The fumes dull the senses of the victim just enough to make him helpless, while at the same time permitting his to see and hear everything that goes on in the room. The only antidote against the charm is pure water, and most of the wealthy Chinese sleep with a basin of this near their heads.

TRAMPS OF THE OCEAN.

Queer Old Boats That Sail Alm-
bassy About

Interesting Facts About a Class of Ves-
sels That Are Unpopular at Sea—
They Are the Terrors of All
Small Craft.

The ocean has its tramps as well as the land. The ocean tramp is, however, of a very different character from the tramp with whom we are familiar. Although, like its namesake of the land, it has no fixed place of abode, but travels about anywhere, it depends for livelihood upon its own work, instead of upon the contributions of others.

The ocean tramp is a steamer, says Gordon, and is built like a sailing vessel, with a mast, sail, and a rudder.

The ocean has its tramps as well as the land. The ocean tramp is, however, of a very different character from the tramp with whom we are familiar. Although, like its namesake of the land, it has no fixed place of abode, but travels about anywhere, it depends for livelihood upon its own work, instead of upon the contributions of others.

OLD BOOTS CHEWED UP.

Then They Are Made Into Beautiful Colored Floor Covering.

A new use has been found, it is said for old boots and shoes which are thrown into a tank, into which steam and dissolving compounds are run. Certain proportions of talc, borax and glue are then introduced and the pulp is run into molds and the figure hardened in the air. These casts are arranged in the proper form or design, when a new process begins.

Miss Bessie Talbott, of Vanille, sailles from San Francisco, today for Sin Chang, China, a missionary of the Presbyterian Church. Miss Talbott is about years of age and the daughter of Hon. Charles H. Talbott, Republican, can be nominated for representative from Woodford county.

Don't Stop Tobacco.

The tobacco habit grows on man until his nervous system is seriously affected, impairing comfort, health and strength. Quite suddenly a tobacco user becomes a slave to the system, and the tobacco habit grows on him.

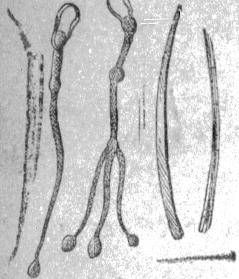

Baco-Curo is a scientific cure for the tobacco habit.

It is a pure, healthy, vegetable product.

THE TERRIBLE KNOT,
An instrument of punishment more
cruel than the "cat."

Our ignorance in the matter of flaying is not a nice one. Happily, some diligent research is needed to learn it fully, for the white instrument of discipline, has almost disappeared in this country. It is a good many years since the "cat" has flourished over the backs of our prison, and its employment in our prisons is exceptional in these days. And even where it does exist the present day punishment of the "cat," inflicted with an instrument that carries no knots and seldom more than fifteen or twenty strokes, is not to be compared with the savage doggings of the past.

The Russian "simon," however, is a much more terrible instrument of torture than the "cat," as will be seen from the accompanying illustration. And, unfortunately, one never knows for certain how much of the knot is left in modern Russia, as telegrams from St. Petersburg carry the word "white" of it from remote Siberia, and only the other day came the news from St. Petersburg of a new imperial ukase "abolishing the use of the knot for the punishment of offenses committed by the peasantry; who have hitherto been completely at the mercy

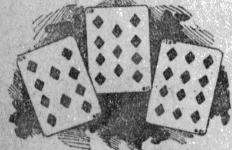

RUSSIAN INSTRUMENTS OF PUNISHMENT.
of the local judges in this respect, because statistics were submitted to the czar showing that in ten years 3,000 persons, mostly guilty of thefts of produce, had died after punishment with the knout."

Granted the infliction of the knout, the 3,000 deaths are easily accounted for, the instrument itself inflicting this to be truly evidently deadlier than its violence. But look in Russia, where the rod and knout have had a more extended and bloody existence than in any other European state, the humane spirit of the age has been felt, and one is disposed to regard as exaggerated the statements just quoted. Certainly it had been generally supposed that the knout was abolished for all but the criminal, as long ago as 1863. But Russia has never been governed wholly by its written laws, and there are regions of that empire where a law may be slow to reach the "local judges."

IMPROVED POKER DECK.

There are Sixty Cards in It, and Eight
May Play in Comfort.

The great American spirit of poker has been very much impeded by those pallid imitations of their kind, the men who enjoy the game. The only fault that could be found with this senatorial pastime was that it did not admit of enough players who could lose

THE TEN, ELEVEN AND TWELVE.

money. The rules of the game were all right, because those were works of genius and are as classic as the symphonies of the Alte Meister. The fault of the pack, because Pharaoh L. of course, didn't know anything about poker, and he is believed to have been the first man who ever correctly called a card.

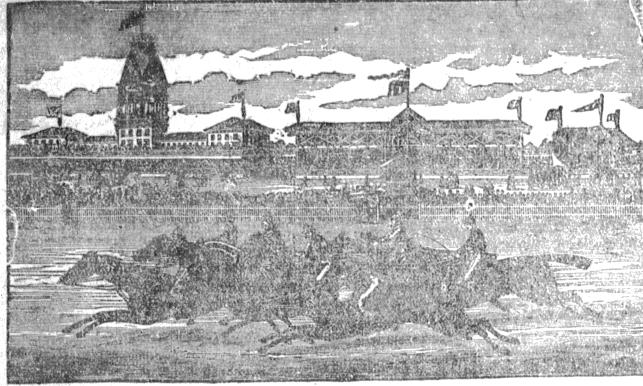

Some benevolent spirit has improved the pack of fifty-two cards, which made it rather difficult sometimes for six men to play. It has dilated it into a pack of sixty cards, so that eight good poker players may truly indulge in their bet to the destruction of their fortunes or the repetition of their stock of good temper.

The cards that are added are the eleven and twelve spots of each suit. The ten spot, in order to alter it into an eleven, has an additional spot in the center, and to become a twelve spot there is given the card three parallel rows of four spots. It is a novelty of the new card kind, and now there will be no longer any unsociableness about the game.

Just think that under this improved condition of things eight of you may have your cards dealt you, and there are twenty still in the pack to choose from.

Prosperity has set in around Middlesborough. Thirty-two coke ovens have been fired up at Mingo mines and thirty more a week will be started until 800 are in operation, says the Courier-Journal.

THE HAZEL GREEN FAIR!

October 2d, 3d and 4th, 1895.

\$1500 IN PREMIUMS

Paid Without Discount.

**To Be Distributed
Among Mountain
People Exclusively!**

Admission, : : : : : : : 25 Cents.

Children, Under 10 Years Old, Free!

J. F. LOCKHART, President.

H. C. QUICKSALL, Secretary.

Medical Society Meeting.

The Wolfe County Medical Society met at Hazel Green Aug. 10, 1895, at the Day house, with the following members present: J. H. Stamper, H. H. Stamper, B. D. Cox, Campton; J. A. Taubis, A. C. Nickell, Hazel Green; J. R. Carroll, Lee City; H. G. Chaney, Daysboro; B. F. Nickel, Caney, G. M. Senter, Stillwater.

Reading of the minutes of last meeting.

Dr. H. H. Stamper was appointed to read paper on Post Partum Hemorrhage before the society at Beattyville, Dr. J. A. Taubis, etc.

Dr. Cox read paper on Cholera Infantum and its treatment.

Dr. Carroll read paper on medicine, its action and use.

Croup was taken up and discussed by the association. Moved that all students of medicine be invited to attend our meeting and that we publicly notify regular practitioners when they claimingly refuse to attend our meetings that we will complain to the state board of health, also to the college from which they graduated.

Program for next meeting: Dr. Profitt, paper on obstetrics; Dr. Baker, paper on dysentery; Dr. Taubis, paper on pneumonia.

Moved that we now adjourn to meet in Campton, at the Come House, Sept. 14, 1895.

Dr. J. H. STAMPER, Pres.

J. R. CARROLL, Secy.

"Fearful."

We know that it sounds fanciful to talk about the electric as a means of cure for disease, but bear in mind one fact that it is the old treatment that has pronounced the case incurable. We do not make the claim that we can cure all curable diseases, but we do maintain with all earnestness that a case pronounced incurable by your family physician is a splendid field for the operation of the Electro-therapist. It may be just as well to say that it is not likely to be so. If it fails, this is no argument against the "Pulse," but in such a case, the fact of the physician's skill is proven to be true. But remember the patient who has been given up by his physician who has again received it through treatment of the Electro-therapist.

One hundred and ninety persons joined the church under the preaching of Evangelist Howard at Morehead last week. It was the greatest revival ever known in Eastern Kentucky.

John Johnson, who murdered Policeman Evans at Mt. Sterling last June, will be hanged at that place tomorrow. This will be the first legal hanging in Montgomery county since the war.

Sidney F. Parker, a young Scott county farmer, was married at Versailles. He celebrated by getting on a spree and the jilt who married him fined him, but sent him to jail for ten days.

"Homeric laughter" is the classical name for unquenchable mirth. It is the sort of laughing which those persons indulge in who take Ramon's Tonic Liver Pill and changed a sallow complexion, dull eyes and pale cheeks, into a ruddy complexion, bright eyes and rosy cheeks. Ask your druggist for a free sample dose.

**ACCIDENT
INSURANCE.**

Nothing Pays Better.

Want a Policy? The United States Mutual is the best and the cheapest. An outlay of \$24 per year will bring you \$50 a week during disability or \$10,000 to your family in the event of death. Yes, you can take a policy for 3 months at a time, but, tomorrow may be too late. See him today.
